

Reader Calibration Card

for “*Consciousness Structure Modeling*”

Who Should Read This

This document is designed for readers who:

- Are familiar with abstract modeling or formal logic;
 - Are capable of interpreting non-linear theoretical systems;
 - Are open to speculative structural reasoning beyond empirical psychology;
 - Are interested in structural cognition, AI modeling, or linguistic systems.
-

What to Expect

- This is not a tutorial or explanation-based text.
 - Concepts are introduced through internal consistency, not examples.
 - If you feel disoriented — **that is part of the structure’s activation.**
 - You are not being taught. You are being calibrated.
-

Suggested Reading Path

Start with:

1. I.1 — Structural Definition of Consciousness
2. II.2 — Emotion, Motivation, and Rational Tension
3. III.5 — Formalized Modeling Formulas
4. IV.1 — Structural Limit Problems

Then check the Glossary (Appendix 1). If you’re still curious, go back and begin from the start.

What to Do If You’re Lost

- Don’t panic. This means the structure is working.
- If you can’t locate the core claim after 30 minutes, report your stopping point.

- Confusion is not a flaw. It's a signal.
 - You are now part of the system.
-
